Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

# Application No. Applicant(s) 10/565,369 IKEDO ET AL. Office Action Summary Examiner Art Unit FRESHTEH N. AGHDAM 2611 -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS. WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status 1) Responsive to communication(s) filed on 04 May 2009. 2a) This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 4.6.7.9 and 10 is/are pending in the application. 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration. 5) Claim(s) 4,6 and 7 is/are allowed. 6) Claim(s) 9-10 is/are rejected. 7) Claim(s) \_\_\_\_\_ is/are objected to. 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement. Application Papers 9) The specification is objected to by the Examiner. 10) The drawing(s) filed on is/are; a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abevance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152. Priority under 35 U.S.C. § 119 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some \* c) None of: Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). \* See the attached detailed Office action for a list of the certified copies not received.

#### DETAILED ACTION

## Response to Arguments

Applicant's arguments filed May 4, 2009 have been fully considered but they are not persuasive.

# Applicant's Argument(s):

Regarding claims 9-10, page 7, the Applicant argues "the individual or combined teachings of the ADRA and Marrs do not suggest the Applicant's claimed configuration or the benefits derived therefrom."

#### Examiner's Response:

Regarding the argument set forth above, Examiner disagrees with the Applicant because According to MPEP 2114 an apparatus is what a device is rather than what a device does "a claim directed to an apparatus must be distinguished from the prior art in terms of structure rather than function... a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus if the prior art apparatus teaches all the structural limitations of the claim." (emphasis added). A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over the instant application's disclosed prior art, and further in view of Marrs et al (US 6,135,099).

As to claims 9 and 10, the instant application's disclosed prior art teaches all the subject matter claimed in claim 1, except for a variable attenuator in the negative feedback loop and said quantizer is configured as a variable-output quantizer, wherein said variable-output quantizer comprises an output transistor switch and a power supply regulator, and varies the power supply voltage of said output transistor switch by means of said power supply regulator. One of ordinary skill in the art would recognize that it is a design choice and/or obvious to include a variable attenuator and a variable quantizer, to provide higher flexibility in regulating the signal-to-noise ratio, and as a result, enhancing the system performance. Therefore, it would have been obvious to one of ordinary skill in the art to include a variable attenuator and a variable quantizer for the reason stated above. One of ordinary skill in the art would recognize that it is well known in the art that the variable-output quantizer employs a transistor switch and a power supply as it is evidenced by Marrs (claim 9 of Marrs) in order to obtain the

Art Unit: 2611

variable-output quantizer. Therefore, it would have been obvious to one of ordinary skill in the art to obtain the variable-output quantizer using a transistor switch and a power supply for the reason stated above.

## Allowable Subject Matter

Claims 4, 6, and 7 are allowed.

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to FRESHTEH N. AGHDAM whose telephone number is (571)272-6037. The examiner can normally be reached on 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chieh Fan can be reached on 571-272-3042. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
